www.cluthavets.co.nz

Welcome

Clutha Vets can trace its first farmer-employed Vet back to 1908 and has been **a farmer owned Vet Club** since 1947. Our elected board of directors is made up of local farmers from throughout the South Otago area and a good number of our staff have farming interests.

Our sole purpose is to provide our clients with the most up-to-date professional animal health advice and services that are available. Our practice has a commitment to ongoing education and training for vets and support staff, and also for our clients. A number of vets hold positions on local, national and international veterinary bodies/committees.

Our farm animal vets provide a complete range of animal health services and advice and our vet and vet nurse teams provide clinical care 24 hours a day, 7 days a week.

The main clinic in Balclutha includes a fully equipped companion animal surgery that performs operations ranging from routine neutering right through to major orthopaedic cases. It also includes a laboratory, full x-ray and ultrasound facilities and two consultation rooms.

The clinic in Milton was refurbished in 2010 and includes a surgery, consultation rooms, x-ray facilities and its own great team of vets, qualified veterinary nurses, and retailers.

The large retail outlet and bulk store enables us to store large quantities of stock to ensure the stock you need is onsite when you need it and at extremely competitive prices. On top of this Clutha Vets runs its own trucks for bulk deliveries to farms, and operates a store in Clydevale and supply depots in Owaka, Lawrence, Momona, Clinton and Lee Stream to help provide convenient access for our clients, and improve our service to you.

What is a Vet Club?

It is a community-based partnership between farmers and vets. In each club farmers actively contribute to the practice at the policy level through a board of directors, while clubs are managed on a day-to-day basis by executive officers (usually senior vets). Vets in a club practice enjoy a supportive environment where professional development is encouraged. Clutha Vets remains one of the few New Zealand vet club co-operatives employing its own vets that **return surplus funds back to its members and the community**.

Clutha Vets Key Points

- 24 hour emergency service 365 days a year.
- Vets with special interests who continue with ongoing training and professional development.
- Up to date facilities & equipment offering world class veterinary treatment for all types of animals.
- Clear pricing policy – all members pay the same low prices for retail goods and services.
- Multi-visit charging for vet travel – if we visit more than one farm on a call then the mileage charge is split among all the farms visited.
- Provide training courses for farmers and pet owners.
- Sponsorship of students at Telford, Lincoln University and Massey Vet School.
- Sponsorship of many local farming related events.
- **In 2012, the Vet Club returned \$110,000 to its members and since 2000 we have returned \$2,301,753 to members in the form of additional discounts.**

Dairy Services

Our team of enthusiastic and committed dairy vets offers a wide range of services to meet the needs of our growing number of dairy clients.

We aim to work with dairy farmers to maximise animal health and profitability with regular consultations and involvement in farmer meetings. We take great pride in the quality of service that we provide, whether it is assisting at a calving in the small hours of the morning, or joining you for breakfast after scanning your cows at milking time.

Our multi-national team of Vets and Rural Animal Technicians are regularly involved with major issues on dairy farms such as mastitis, fertility and lameness. Mastitis services include Grade Busting and comprehensive shed visits at milking time, and we also provide in-house culturing of milk samples. Fertility services include Metricheking (detection and treatment of 'dirty' cows), non-cycling cow programmes and synchrony programmes for cows and heifers. Lameness services include corrective trimming of lame and overgrown claws, using our portable WOPA crate and advice on lameness prevention. We also provide regular monitoring of trace element supplementation programmes through blood testing and liver biopsies, and advice on rearing heifer replacements, including weighing and drench programmes.

Our competitively priced pregnancy testing service is focused on accuracy, safety and efficiency, and allows us to ensure precise knowledge of calving dates and optimum timing of inductions through comprehensive recording systems and reports. The large number of clients who continue to use these services year after year allows us to benchmark your performance against other herds in the area. This information is presented at our annual winter meetings, along with informative presentations from our local vets and top quality guest speakers.

Our vets regularly attend meetings and conferences to keep up with all the latest information and research developments, and we have strong representation within the Dairy Cattle Vets' Society of NZ, actively involved in thwarting many of the current threats to the dairy industry.

We also offer: Newsletters, month by month reminders, seminars and training for farm staff

Sheep Services

Clutha Vets employ vets with a special interest and many years experience in sheep production and disease prevention.

As well as the usual veterinary services covering general husbandry and disease control & prevention, we also offer more specialist services covering areas such as:

- Comprehensive internal parasite & drench resistance management and advice including faecal egg counts and faecal egg count reduction tests.
- General parasite management.
- Flock fertility analysis and advice on correction of problem areas.
- Trace element monitoring and advice.
- Flock nutrition advice.
- Specialist animal health product knowledge and advice.
- Disease prevention and control programmes.
- Animal health calendars and plans specific to your farm
- The vets regularly attend meetings and conferences to keep up with all the latest information and research developments, and we have strong representation within the Sheep & Beef Cattle Veterinarians Society.
- Various farmer educational initiatives
 - A programme to correctly identify udder faults in ewes
 - Bi monthly newsletter
 - Seminars

Small Animal Services

While Clutha Vets formed as a farmer co-operative, pet animals are an integral and important part of the practice. The decision was made many years ago to employ vets to do solely small animal practice and ensure the highest quality of service possible. Our three full time dedicated small animal veterinary surgeons have over 60 years of combined experience in small animal medicine and surgery, so you can rest assured of the best treatment for your pet dog, working dog, cat or other small pet. Barbara Christensen is based at the Clutha Vets Milton clinic on Union Street. Peter Heslip and Catherine Copland are based at the Clutha Vets Balclutha clinic on Wilson Road. There is a fantastic team of experienced and qualified veterinary nurses at both clinics providing care for your animals. In addition, we have a team of vets who are experienced with small animals as well as farm animals. This means we are able provide a high quality dedicated small animal service with experienced vets and vet nurses available 24 hours a day, 365 days a year.

Both the Milton clinic and the Balclutha clinic are fully equipped with gas anaesthetic, in-house laboratory facilities, heated hospital and recovery wards, ultrasonic dental machines with high speed drills, ultrasound and x-ray facilities, operating theatres and isolation facilities. We provide high quality dental care, and surgical care from routine de-sexing to major soft tissue surgery and we carry out many laboratory tests in-house so the results are available immediately. Our Balclutha clinic is also equipped to carry out a wide range of orthopaedic surgeries including bone plating and pinning for fracture repair and joint surgery. Each clinic has modern, well-equipped consulting rooms and we offer routine consultations throughout the day Monday to Friday and treatment for emergency cases 24 hours a day. In addition, the Balclutha clinic is open for consultations and retail sales on Saturday mornings and Tuesday evenings.

You can book a consultation with one of our friendly team of nurses for dietary, health and behavioural advice. We also offer a trimming and nail clipping service. Our retail area has a large range of quality pet foods, toys, bedding, grooming equipment, coats, collars, leads and more. Our nurses run puppy classes, which offer socialisation and advice on training and puppy care. We also have a Rehoming Programme for Kittens and Cats, as a service to the community in the absence of a local SPCA branch.

As a member of the Clutha Veterinary Association you will receive a wide range of discounts and special offers on our small animal services and products.

Members receive:

- 10% incentive discount (members rates) on small animal consultation fees, vaccinations and routine de-sexing surgery.
- 10% incentive discount (members rates) on a wide range of dispensed small animal drugs.
- 10% incentive discount (members rates) on most pet supplies.
- Nurse consultations are free all year round to members.
- Every quarter you will receive a copy of "Two Cats One Dog", the vet magazine for pet lovers.
- Vet Club membership costs only \$23 per year, (see last page).

Finally, for those of you who are Facebook literate you can post a photo and story about your pet on our Facebook page and be in to win a goody bag for your pet. Remember all these benefits are only for our members and terms and conditions do apply.

The small animal teams at Clutha Vets Balclutha and Clutha Vets Milton are looking forward to welcoming you as a new member and look forward to caring for your animals.
